

Microsoft Certified Professional – MCP Assess. Train. Certify.

Programme overview

Microsoft Certifications validate IT professional expertise through rigorous, industry-proven, and industry-recognized exams that cover a wide range of Microsoft products, technologies and solutions. Students who become an MCP take their first step in achieving even more distinguished credentials including Microsoft Certified Solutions Expert (MCSE) and Microsoft Certified Solutions Developer (MCSA).

Provision's MCP training products and digital certification bundles support your training business using the latest in Microsoft technologies. Provision allows you to differentiate your business within the IT training and certification market.

See for yourself!

The total list price for an eBook, Microsoft Official Practice Test and exam voucher is £183.32. Save up to 40% off the individual product list price through Provision!

The diagram illustrates the components of the Microsoft MCP MeasureUp & eBook Bundle (exam 70-410). On the left, three individual items are listed with their prices: an eBook 'Installing and Configuring Windows Server 2012 R2' for £20.71, a 'Microsoft CERTIFIED Official Practice Test' for exam 70-410 for £64.10, and a 'Microsoft MCP' Certification Exam Voucher for £98.51. A large blue arrow points from these items to a rounded rectangular box on the right representing the bundle. The bundle box contains the same three items and is labeled 'Microsoft MCP MeasureUp & eBook Bundle (exam 70-410)'.

Whatever IT training your students need – security, database, mobility or cloud computing ... Microsoft Certified Professional training and certification helps them achieve their goals and provides a fast track to career success. See details below about Microsoft Certification pathways and align your training curriculum with Microsoft's best-in-class certifications.

Microsoft Certified Solutions Associate (MCSA)

MCSA certification provides core technical skills on the following products and are a prerequisite to the MCSE expert-level certifications.

| | |
|------------------------------|-----------------|
| Windows Server 2008 and 2012 | SQL Server 2012 |
| Windows 8, Windows 10 | Office 365 |

Microsoft Certified Solutions Expert (MCSE)

MCSE credentials validate and demonstrate a student's abilities to build innovative solutions across the following Microsoft technologies; both on premise and in the cloud.

| | | |
|------------------------|---------------|-----------------------------|
| Server Infrastructure | Messaging | Enterprise Devices and Apps |
| Desktop Infrastructure | Communication | Data Platform |
| Private Cloud | SharePoint | Business Intelligence |

Microsoft Certified Solutions Developer (MCSD)

MCSD certification validates a student's ability to design and build solutions that extend beyond traditional platform boundaries across multiple devices and the following applications.

| | |
|--------------------|-----------------------------------|
| Windows Store Apps | SharePoint Applications |
| Web Applications | Applications Lifecycle Management |

Microsoft Specialist: Azure

Students are able to expand their skills to meet future business needs with certifications focused on developing, implementing and architecting Microsoft Azure. Azure provides more than half of all Fortune 500 companies with cloud services.

For students who are just getting started.

Microsoft Technology Associate (MTA)

The MTA is an introductory Microsoft certification for individuals considering a career in technology. MTA training focuses on validating fundamental technology concepts with the following tracks.

| | | |
|-------------------|----------|-----------|
| IT Infrastructure | Database | Developer |
|-------------------|----------|-----------|
